

ET-6600

reliability and exceptional value at the point of service for bars and restaurants

Strongly built and realistically priced, the ET-6600 can be a stand-alone, pre-set ECR or part of an EPOS system

- *Server Interrupt (several servers can use the ET-6600 at the same time)*
- *Easy Price/Name Change*
- *Inter Register Communication with Floating Server*
- *Links to back office PC and stock control software, if required*
- *On-screen Menu Prompts guide servers through the order*

**SMART ECR SYSTEMS
THAT DO MORE - COST LESS**

Serving the hospitality industry since 1957

Proven hardware plus the latest built-in ECR software, makes the ET-6600 the *smart* choice for all hospitality locations

Displays

The 16-digit alpha-numeric operator display describes all items by name and gives user-friendly 'prompts' to servers to ease and speed service.

Monetary amounts are displayed on front and rear in 13 mm brilliant green figures, for clear supervision.

The rear display can be raised and rotated to the desired position.

In-Built Programme

The ET-6600's programme is held in reliable, solid-state memory, enabling you or your Dealer to switch on only the options you need to suit your business from the many choices available.

Design your own Keyboard

The flat, spill resistant keyboard has pressure-sensitive, raised domes for reliable, one-touch entry.

You or your Dealer can customise the 128 keyboard positions, to provide exactly the features and functionality you need.

Printed Coloured Keyboard Overlays

Your Dealer can supply professionally printed and laminated spill-resistant keyboard layouts. If you prefer to change layouts yourself, 'Joseph', the Geller Colour Keyboard Layout and Design Programme, is obtainable from your Dealer.

Low Cost of Ownership

Unlike PC-based EPOS systems, the ET-6600 incorporates its programming and data in solid state memory. The benefit of this increased reliability is passed on to the user in lower maintenance costs.

Powerful Reporting

A wide choice of clear, concise Management Reports provides the information you need to control your business. A series of pre-selected Reports can be programmed to print at the touch of one button.

Some of the many important features

- Half Pint and Doubles
- Happy Hour with automatic Price/Time Change
- Server Interrupt (several servers can use the ET-6600 at the same time)
- Scroll Back/Scroll Forward with Error Correct
- Drawer Alarm with programmable time delay

- Compulsory Closed Drawer
- Up to 8 ET-6600s can be linked by Inter Register Communication (IRC)
- Up to 2 Kitchen Printers can be linked to one ET-6600. Depending on the other requirements, up to 4 Kitchen Printers can be linked to the IRC network
- Choice of Dot Matrix Guest Check Printer for pre-headed customer bills or Thermal or Dot Matrix 'Soft' Guest Check Printer using 80 mm wide continuous paper roll
- RS232C Ports (3 maximum)

BACK OFFICE PC AND GELLER SOFTWARE

A range of Geller Software Packages is available for use with the ET-6600 -

'Joseph' is a Keyboard Design Package for producing high-quality, coloured keyboard layouts.

Geller Programming Utility simplifies setting up the ET-6600 and changing names and prices using a PC.

Sam for Windows is single/multi-site sales and management software. Sam for Windows can also export data to other software packages - such as Excel, for instance - where users have specific information requirements.

SuperStock is a single/multi-site Windows-based stock control package for head office and remote sites.

Your dealer can supply detailed information on Geller Software.

Leading software houses also choose Geller ECRs as their preferred terminals.
