and  
simplicity  
at the  
point of  
service*

**plus  
intelligent reporting  
for effective  
management control**

Shown with optional stainless steel stand.  
Can be wall mounted.

**GELLER POINT OF SALE SYSTEMS**

# Your business is unique. That's why your Geller- Vectron system will be too.

## Uniquely clever terminals

Geller-Vectron terminals combine the best features of ECRs and PC systems in a unique concept. Their solid-state memory provides the ECR advantages of long life, simplicity and robustness at the point of sale.

However Geller-Vectron terminals also incorporate the versatility of PC systems. They are loaded with desirable features for retailing and hospitality as a result of many years' experience of installing thousands of systems in different types of businesses throughout the world.

## Unique now and in the future

Your investment in Geller-Vectron terminals is protected because they incorporate solid-state flash ROM technology. This means that, as new features become available, your Geller-Vectrons can be upgraded to the latest specification.

## Unique at the point of sale

Geller-Vectron offers a range of terminals, each of which can be customised to meet the requirements of individual points of sale. Uniquely, all Geller-Vectron terminals share the same software platform so that different Geller-Vectron models can be mixed within the same network - say POS Mini Colour units in the bar with ColourTouch and POS Mobile Pro units in the restaurant. Orders started on one terminal can be finalised on any other terminal in the system.

## Uniquely flexible

You can even mix PC terminals - such as the Geller TS-600 - with Geller-Vectrons in the same network, thus combining PC versatility with the solid-state reliability of Geller-Vectron terminals.

## Uniquely clever software

*Commander* software programmes the Geller-Vectron terminals and collects sales data from all terminals in the system, in house or at remote sites. For back office reporting, *Commander's* reports can be exported to spreadsheets such as Excel.

For inventory control in general retailing and hospitality applications, *Commander* links to Geller *SuperStock* software. However, many industries - such as hotels, bakeries, bookshops, pharmacies etc. - already use industry specific software. In these cases, *Commander* provides a seamless link from the terminals to the software of your choice.

## Uniquely fast

All Geller-Vectrons incorporate 64-bit microprocessors for high-speed operation and 100 mbps LAN for super-fast communication between terminals.

## Uniquely safe

You can automatically back up all sales and programme data every 60 seconds onto a plug in, removable USB memory stick. If you need to swap Geller-Vectrons, you can simply remove the memory stick - even part way through a sale - plug it into the new terminal and carry on trading without loss of data.

## Uniquely low cost of ownership

Whatever software configuration or mix of terminals you choose, you will certainly want reliability and good on-going support to be part of the deal. That is why every Geller-Vectron terminal contains *Vpos Anywhere*. This in-built utility permits on-line low-cost, speedy support without the need for an engineer's visit.

## The Geller-Vectron Family at the point of sale

### POS Mini Colour

The keyboard operated choice for restaurants, bars, fast food and retail outlets where quick service is needed and space is at a premium.

Colour-coded drop down menus on the screen speed service by prompting operators. The colour screen enhances security by highlighting transactions such as 'Voids' or 'Paid Outs' in different bright colours. The 108 button keyboard can be programmed with 'one touch' buttons for commonly sold items.

Also available with touch screen

Width: 225mm (235 mm with Server Lock)  
Depth: 360mm Height: 280mm (display raised)  
150mm display folded

### ColourTouch

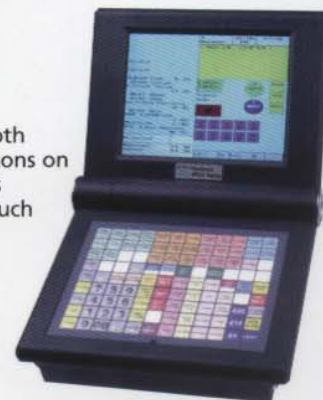

The superb 12.1" colour TFT screen has 3D buttons and icons. It is brilliantly visible in both bright and softly lit environments. Robust and simple to operate, ColourTouch guides even new and part time servers quickly through on-screen menu choices. A Table Plan of your restaurant shows how long tables have been occupied and what tables are free. Table booking feature allows reservations to be entered into the terminal.

Width: 360mm Height: 315mm  
Depth: 89 mm

### POS Vario

POS Vario provides the best of both worlds - say, fast 'one touch' buttons on the keyboard for drink items plus pop up menu windows on the touch screen for food choices and cooking instructions.

Width: 300mm Depth: 400mm  
Height: 310mm

### POS Mobile Pro

Speeds service and increases customer spend by sending orders straight from the customer's table to kitchen and bar. Water and dust resistant, this self-contained, hand-held EPOS terminal has the same functionality as the rest of the Geller-Vectron range. Ideal for open-air situations such as garden centres, pub gardens and swimming pool/barbecue areas.

Width: 77mm Depth: 27mm  
Height: 185mm
