GELLER POINT OF SALE SYSTEMS

Innovation through experience

Your point of sale is now the whole area of your business

Your customers can remain comfortably seated on the patio, in the garden or lounge while your staff move among them and take their orders. You will provide better service with less effort, fewer servers and earn more through increased sales.

Fast, wireless operation - on or off line

POS Mobile Pro is a self-contained, hand-held, touch screen, wireless terminal with the same functionality as the mains-powered models in the Geller-Vectron range.

In large areas, such as beer gardens, stadia, hotels, leisure parks, golf courses, etc. there is no need to cover the whole area with wireless access points.

When out of range, POS MobilePro continues to operate offline. It returns on line as the user walks within wireless range and automatically transmits the stored data to kitchen/bar printers.

Hi-tech - low cost

Using industry standard wireless LAN, the MobilePro can be integrated into existing Geller-Vectron networks and offers roaming capability as standard. Inexpensive wireless access points can be added to the network, as necessary. Wireless LAN communication speeds are up to a thousand times faster than 433 Mhz or DECT radio networks.

The powerful lithium-ion battery provides power for an average of 10 hours. It can be replaced quickly and, unlike ni-cad batteries, can be charged for short or long periods with no adverse effect on battery life.

Bluetooth communication capability is included within MobilePro to future proof its use as new peripheral devices become available.

Lightweight yet strong

Unlike PDA or palm devices that have been adapted for use as order takers, the MobilePro is specifically designed for hard work in hospitality and retailing environments.

The ultra-light, all-metal magnesium housing is shock resistant. Being dropped, exposed to rain or liquid spills is part of a day's work for MobilePro.

Brilliant by design

Even in strong sunlight, the screen is bright and clear due to the transfective technology in the TFT colour display.

If the unit is tilted - for example to show an order or bill to a customer - the tilt sensor automatically rotates the screen information by 180°.

A power-saving brightness sensor automatically switches on the background lighting of the keyboard buttons, when necessary.

Waiter call and vibration alarm

The call alarm vibrates and flashes the display to advise servers noiselessly when, for example, a food order is ready.

The Geller-Vectron Family at the point of sale

POS Mini Colour

The keyboard operated choice for restaurants, bars, fast food and retail outlets where quick service is needed and space is at a premium.

Colour-coded drop down menus on the screen speed service by prompting operators. The colour screen enhances security by highlighting transactions such as 'Voids' or 'Paid Outs' in different bright colours. The 108 button keyboard can be programmed with 'one touch' buttons for commonly sold items.

Also available with touch screen

Width: 225mm (235 mm with Server Lock)
Depth: 360mm Height: 280mm (display raised)
150mm display folded

Width: 360mm Height: 315mm
Depth: 89 mm

ColourTouch

The superb 12.1" colour TFT screen has 3D buttons and icons. It is brilliantly visible in both bright and softly lit environments.

Robust and simple to operate, ColourTouch guides even new and part time servers quickly through on-screen menu choices. A Table Plan of your restaurant shows how long tables have been occupied and what tables are free. Table booking feature allows reservations to be entered into the terminal.

POS Vario

POS Vario provides the best of both worlds - say, fast 'one touch' buttons on the keyboard for drink items plus pop up menu windows on the touch screen for food choices and cooking instructions.

Width: 315mm Depth: 400mm
Height: 355mm (Display raised)
130mm (Display folded)

POS MobilePro

Speeds service and increases customer spend by sending orders straight from the customer's table to kitchen and bar. Water and dust resistant, this self-contained, hand-held EPOS terminal has the same functionality as the rest of the Geller-Vectron range. Ideal for open-air situations such as garden centres, pub gardens and swimming pool/barbecue areas.

Width: 77mm Depth: 27mm
Height: 185mm
